

Integrated Business Management System Scope

IBMS/JA05/STR/001

RZM Murowa explores, mines and processes diamondiferous ore to recover diamonds for local and international markets. The Integrated Business Management System (IBMS) is based on ISO 9001:2015, 14001:2015 and 45001:2018 standards. Its scope covers internal and external processes, activities, products and services carried out at the RZM Murowa Mine site, Harare office and Sese exploration site.

Core processes and support services include:

Core processes

- Exploration
- Mining
- Processing and recovery
- Sorting and sales

Support services

- Fixed, mobile plant/equipment maintenance and site services
- HSEQ management
- Human resources management and administration (IST & Village)
- Security services
- Technical services
- Financial management (Procurement & Warehouse management)

The scope for the IBMS certification shall be summarised as “**Exploration, mining and processing of diamondiferous ore to recover diamonds including all internal and external products and services**”.
